Applicant's response to restriction requirement filed 2/27/2006 is acknowledged.

Applicant elected Group I invention (claims 1-2, 4-8, 12-22) without traverse.

Upon review of the previous office action further restriction deemed necessary as following because it is not totally clear whether the method claims are merely directed to utility of KIF18A polypeptides, or their encoding DNA or both:

Group I(a):claims 1-2, 4-8, drawn to methods of screening for modulators of genes encoding KIF18A polypeptides utilizing test compounds, classified in class 435, subclass 6.

Group I(b), claims 1-2, 4-8, drawn to methods of screening for modulators of KIF18A polypeptides utilizing test compounds, classified in class 435, subclass 18.

Group I(c): claims 12-22, drawn to methods of modulating the activity of KIF18A, classified in class 435, subclass 18.

Group I(d): claims 12-22, drawn to methods of modulating the activity of KIF18A encoding genes, classified in class 435, subclass 6.

The inventions of Groups I(a)-(d) are patentably distinct each from the other because each method has different steps and different end-points.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

This application contains claims 1-2, 4-8 directed to the following 10 patentably distinct species: **antisense, siRNA, ribozyme, triple helix molecule, antibody, polypeptide, polypeptide mimetic, peptoid, inorganic small molecule, small**

Art Unit: 1653

nucleic acid organic molecule. The species are independent or distinct because they each have unrelated chemical structure and function.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. **Currently, 1-2, 4-8 are generic.**

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

Art Unit: 1653

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Maryam Monshipouri whose telephone number is (571) 272-0932. The examiner can normally be reached on 7:00 a.m to 4:30 p.m. except for alternate Mondays.
